

K. Attachment Log

Attachment Log

This attachment log summarizes any attachments received with a particular letter, some of which are included in this Comments and Responses document and others that are available for review at the San Francisco Planning Department. If the attachments contain direct comments on the adequacy or accuracy of the Draft PEIR, they are included along with the comment letters in Chapter 12 and are treated as individual comments. However, in other instances the attachments provide generic information supporting some aspect of an agency or organization's mission (e.g., description of a city's conservation program and activities) and are not directly related to the adequacy or accuracy of the Draft PEIR; those materials are not produced in this document but are available for review at the San Francisco Planning Department.
